# “Konzil”

- discuss scientific topics across former group boundaries!
    - ❖ we are large group with diverse topics;  
cover everything from radio, IR, VIS, UV, X-ray,  $\gamma$ -rays!  
and all distance scales: from Sun/comets to highest redshift  
→ makes communication sometimes difficult
    - ❖ BUT: it also holds promises! We have a broad range of expertise!!  
We just have to make use of it!!!  
→ Triggering collaborations among us is main goal
  - Plan for  $\frac{1}{2}$  - 1 day meetings according to scientific themes
    - ❖ AGN / deep fields
    - ❖ binaries / CVs / novae / transients
    - ❖ pulsars / neutron stars
    - ❖ massive stars / star formation
    - ❖ clusters
    - ❖ early Universe / cosmology / GRBs
    - ❖ additional... (grouping TBD: Sun/comets/diffuse emission/...)
- Proposals for further topics are welcome!
- Volunteers needed to organize each topical meeting!
